

Mr. Thirsty The Original Water Eater is the safe, convenient way to keep your home or office drier, warmer, and more energy efficient.

This product soaks up and holds over 1000% of its weight in water or water-based liquids. Its standard 36" length offers protection to most windows. (Use three to protect most sliding glass doors.) It's easy to use, easy to dispose of, and easy to store.

Mr. Thirsty The Original Water Eater in your home or office will stop:

- Water damage to windowsills, walls, wood floors, and carpet
- Dampness and mildew
- Drafts from cracks and poorly sealed doors and windows
- The danger of slipping from accidental spills
- The need for unsightly rags, newspapers, buckets, and towels requiring messy and frequent clean up

Mr. Thirsty The Original Water Eater reduces heating and cooling costs both summer and winter.

### **Easy Disposal**

Mr. Thirsty The Original Water Eater can be placed in regular trash or burned in a standard wood burning fireplace. The product is Non-Toxic and safe for handling or contact by children or pets.

### **Directions**

Simply remove Mr. Thirsty The Original Water Eater from the package, and place in contact with trouble areas. This product can be molded to the shape of any surface where it is placed. Since water is locked in, you cannot squeeze the water out. Some swelling will occur when filled to capacity. Mr. Thirsty The Original Water Eater can be used to absorb oil-based liquids as well as aqueous.

### **Mr. Thirsty The Original Water Eater**

*Mr. Thirsty* is reusable for many saturations. Just allow natural drying by evaporation either in the place where it was used or move to a location either over a hot air register or sunlight. *Do not dry product in ovens or appliances.*

*Mr. Thirsty* soaks up and holds over 10 times its weight in water and water based liquids. This amount is in excess of 100 fluid ounces or up to one gallon of liquids. It will return to its original size and capacity through natural evaporation allowing the product to be continuously reused.

*Mr. Thirsty* is 36" long, making it easy to use, easy to dispose of, and easy to store. Upon removal from the box, prior to use, simply stretch the product to its full length to evenly distribute the contents within the covering.

*Mr. Thirsty* can be molded to the shape of most surfaces where it is placed. When dried, after saturation, the product will appear stiff and lumpy. This will not affect the absorbing capacity in any way and with light hand pressure, Mr. Thirsty will return to the original granular condition for easy placement around objects or corners.

*Mr. Thirsty* will lock in the liquid absorbed and some swelling will occur when filled to capacity but you can not squeeze or wring it out. After repeated use and drying, some staining of the covering will occur.

*Mr. Thirsty* is manufactured by Sheen Kleen Inc., the foremost producer of industrial absorbents used in plants and factories, office buildings and public institutions. These products are 100% made in the USA.

- For leaking basement walls, water heaters, and condensation problems.
- For leaking washing machines, air conditioners, appliances and drains. Prevents water stains and slipping.
- For leaking windows, sliding glass doors. Stops water marks, dampness, and drafts. Reduces heating and cooling bills.
- For leaking sliding glass doors, place products end to end to soak up moisture.
